

BIWEEKLY COLLOQUIUM

Semester topic "Settlement Patterns and Settlement Agglomeration"

Monday, July 9th, 4:15 p.m.

Landscape Archaeology of Late Neolithic and Early Copper Age in Moldova, Romania

Doris Mischka (University of Erlangen-Nuernberg)

Since 2015 the Erlangen Institute for Pre- and Protohistory is conducting geomagnetic surveys and excavations in Moldova. Actually two regions: the Neamț depression close to the Carpathian mountains and the area around Scânteia, close to Iași. Additionally sites from Suceava and next to Botoșani close to the Prut river have been in focus. In two excavation campaigns, a well preserved dwelling was dug out.

Within the presentation, the research objectives and actual state of research are shown.

Venue: Leibnizstraße 1, Seminar Room 204
