

GRADUATE SCHOOL AT KIEL UNIVERSITY
human development in landscapes

INTERNATIONAL OPEN WORKSHOP

Socio-Environmental Dynamics over the Last 12,000 Years: The Creation of Landscapes V

March 20 – 24, 2017 / Kiel University

Sessions

- How's life? Living conditions in Europe in the 2nd and 1st millennia BC
- Structure, network and space: Neolithic and Chalcolithic settlements and their social meaning
- 'Tonight will be a memory too' – Memory and landscapes
- Lost in the lowlands – complementing the early late glacial puzzle
- Thinking inside the vessel: Ceramic development in prehistory through the interpretation of vessel use and function
- Exploring inter-regional interactions in the first millennium BC in Europe
- Quantitative approaches as a basis for simulation of prehistoric economy and environment
- Spatial analysis for an understanding of ancient human-landscape developments
- Agent based modelling of human-environmental interactions in archaeology: Putting models into practices
- Understanding inequality: New perspectives
- From pre-urban structures to cities: Urban space as an action context
- Deserted places as objects of historical science – Approaches and issues
- Interrelationships of climate, environment and socio-cultural changes through the Mid- to Late Holocene in the Mediterranean area
- Extrapolating from the provincial: Linking ancient societies, technologies, and landscape use in Eurasia
- Riverbanks and seashores: The Baltic Sea basin and adjacent areas in the Early and Mid-Holocene
- Archaeology and environmental history in lake catchment areas
- Comparative studies in Stone and Bronze Age demography
- Lakescapes and seascapes of Neolithic and Bronze Age societies
- Archaeological heritage management – The practical side.

Deadline for submitting abstracts: November 30, 2016

Deadline for registering: February 2, 2017
